blockchain technology introduction to pdf

Blockchain-based smart contracts are proposed contracts that could be partially or fully executed or enforced without human interaction. One of the main objectives of a smart contract is automated escrow. An IMF staff discussion reported that smart contracts based on blockchain technology might reduce moral hazards and optimize the use of contracts in general.

The retrieved articles were analyzed based on title, abstract, and keywords. The two main selection criteria were (1) the match to the previously introduced concepts of blockchain technology and the sharing economy (see 2.1 or 2.2), and (2) the focus on trust. A paper was excluded from the review, if the notion of trust was only briefly mentioned and not addressed by means of a valid ...

Bitcoin (â) is a cryptocurrency, a form of electronic cash. It is a decentralized digital currency without a central bank or single administrator that can be sent from user-to-user on the peer-to-peer bitcoin network without the need for intermediaries.. Transactions are verified by network nodes through cryptography and recorded in a public distributed ledger called a blockchain.
