

celiac disease methods and pdf

Celiac disease is an autoimmune disorder characterized by an inappropriate immune response to gluten, a protein found in wheat, and related dietary proteins in rye and barley. Celiac disease antibody tests are a group of assays developed to help diagnose and monitor the disease and a few other gluten-sensitive conditions. These tests detect autoantibodies in the blood that the body produces as ...

Diagnosis and Management of Celiac Disease | American

Serology is the scientific study of serum and other bodily fluids. In practice, the term usually refers to the diagnostic identification of antibodies in the serum. Such antibodies are typically formed in response to an infection (against a given microorganism), against other foreign proteins (in response, for example, to a mismatched blood transfusion), or to one's own proteins (in instances ...
