Most intelligent tutoring systems have step-based or substep-based granularities of interaction, whereas most other tutoring systems (often called CAI, CBT, or CAL systems) have answer-based user interfaces. It is widely believed that as the granularity of tutoring decreases, the effectiveness increases.

What is an Intelligent Tutoring System? One reason that ITS is such a large and varied field is that "intelligent tutoring system" is a broad term, encompassing any computer program that contains some intelligence and can be used in learning. ITS is an outgrowth of the earlier computer-aided instruction or CAI model, which
