climate change, agriculture and food security 2016 in brief the state of food and agriculture

In brief –“ The State of Food and Agriculture 2016 (SOFA)

Sustainable development is the organizing principle for meeting human development goals while at the same time sustaining the ability of natural systems to provide the natural resources and ecosystem services upon which the economy and society depend. The desired result is a state of society where living conditions and resource use continue to meet human needs without undermining the integrity ...

Sustainable agriculture can be understood as an ecosystem approach to agriculture. Practices that can cause long-term damage to soil include excessive tilling of the soil (leading to erosion) and irrigation without adequate drainage (leading to salinization). Long-term experiments have provided some of the best data on

how various practices affect soil properties essential to sustainability.

Sustainable agriculture - Wikipedia

As environmental concerns and rising energy costs have an ever-increasing impact on our daily lives, individuals are learning to integrate concepts of sustainability into their regular routines.
