You'll learn to code in Python and make your own neural network, teaching it to recognise human handwritten numbers, and performing as well as professionally developed networks. Part 1 is about ideas. We introduce the mathematical ideas underlying the neural networks, gently with lots of illustrations and examples. Part 2 is practical.

By creating our own neural networks code, from scratch, we can really start to understand them, and the issues that emerge when trying to apply them to real problems. We don't get that learning and experience if we only learned how to use someone else's library.
