Managing Your Type 2 Diabetes - The Basics - NDEI

Diabetes is a disease that requires 24-hour, 7-day-a-week self-management. It is you who lives with your diabetes and it is you who will make health care decisions when your doctor or other members of your health care team are not available. Blindness or low vision may present challenges, but aren't ...

How Can I Manage My Diabetes? - VisionAware

The term diabetes includes several different metabolic disorders that all, if left untreated, result in abnormally high concentration of a sugar called glucose in the blood. Diabetes mellitus type 1 results when the pancreas no longer produces significant amounts of the hormone insulin, usually owing to the autoimmune destruction of the insulin-producing beta cells of the pancreas.

vegan vs keto for diabetes – which is one optimal

Approximately 25.8 million people are currently affected by diabetes. Diabetes is the leading cause of kidney failure, non-traumatic lower-limb amputations, and new cases of blindness among adults in the United States.

Diabetes Meal Planning: A Roadmap to Your Diet | The Good

Diabetes is a problem with your body that causes blood glucose (sugar) levels to rise higher than normal. This is also called hyperglycemia. Type 2 diabetes is the most common form of diabetes. If you have type 2 diabetes your body does not use insulin properly. This is called insulin resistance. At ...

Type 2 - American Diabetes Association

A diagnosis of diabetes can be done using a variety of blood tests. If you are at increased risk of diabetes, have symptoms of diabetes, or have pre-diabetes (a major warning sign for diabetes), your doctor will check to see if you have diabetes. Your doctor may also check to see if you have diabetes if you are over the age of 45, have a family history of the disease, are overweight, or if you ...

High blood pressure, or hypertension, is a dangerous condition that affects approximately 30 percent of Americans, causing up to 60,000 deaths per year. High blood pressure is often called "the silent killer" because it typically has no symptoms until after it has done significant damage to the heart and arteries. In fact, almost 20 percent of Americans who have high blood pressure don't ...
