Signals intelligence (SIGINT) is intelligence-gathering by interception of signals, whether communications between people (communications intelligence—abbreviated to COMINT) or from electronic signals not directly used in communication (electronic intelligence—abbreviated to ELINT). Signals intelligence is a subset of intelligence collection management.

### **Signals intelligence - Wikipedia**

In communication systems, signal processing, and electrical engineering, a signal is a function that "conveys information about the behavior or attributes of some phenomenon". A signal may also be defined as an "observable change in a quantifiable entity". In the physical world, any quantity exhibiting variation in time or variation in space (such as an image) is potentially a signal that ...

### **Converting an A to 12v Adding Turn Signals**

Often times, complex signals can be simplified as linear combinations of certain basic functions (a key concept in Fourier analysis). These basic functions, which are useful to the field of engineering. These functions will be described here, and studied more in the following chapters. The unit step ...

5/2/2014 Fire Alarm FAQs Question Answer Q: How many zone/circuit fire alarm panel do I need? A: The size of a fire alarm panel is determined by a number of factors, including the size of the building, the number of devices, and the job's requirements. A zone is a defined area in a building in which related functional items work together.
