I'm a 27 year old Christian man who believes in the Word of God, the Bible, and that we are living in the end days, those days before the return of Jesus Christ

Survive The Earth Changes

The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. Blood provides the body with oxygen and nutrients, as well as assists in the removal of metabolic wastes. In humans, the heart is located between the lungs, in the middle compartment of the chest.. In humans, other mammals, and birds, the heart is divided into four chambers ...

Management of the Patient With Congestive Heart Failure

Terminology. Heart failure is a pathophysiological state in which cardiac output is insufficient to meet the needs of the body and lungs. The term "congestive heart failure" is often used, as one of the common symptoms is congestion, or build-up of fluid in a person's tissues and veins in the lungs or other parts of the body. Specifically, congestion takes the form of water retention and ...
