The Logical Thinking Process: A Systems Approach to

Critical Thinking is the process of using reasoning to discern what is true, and what is false, in the phrases and "sound bytes" we hear everyday. Part of it involves being familiar with logic and logical fallacies - those bits of false

Critical Thinking - Robin Wood

Abductive Reasoning . Abductive Reasoning Abductive reasoning is similar to inductive reasoning, but differs in that observations are always incomplete. Abductive reasoning begins with an incomplete set of observations and proceeds to the likeliest possible explanation for the set. The abductive process can be creative, intuitive, and sometimes ...

mathematics. Also, in saying that logic is the science of reasoning, we do not mean that it is concerned with the actual mental (or physical) process employed by a thinking being when it is reasoning. The investigation of the actual reasoning proc-ess falls more appropriately within the province of psychology, neurophysiology, or cybernetics.
