## **the lure of the pdf**

A fishing lure is a type of artificial fishing bait which is designed to attract a fish's attention. The lure uses movement, vibration, flash and color to bait fish. Many lures are equipped with one or more hooks that are used to catch fish when they strike the lure. Some lures are placed to attract fish so a spear can be impaled into the fish or so the fish can be captured by hand.

A spoon lure, in sport fishing, is an oblong, usually concave lure, usually made of metal or a shell, shaped like the bowl of a spoon. The spoon lure is mainly used to attract fish by reflecting light and moving randomly. The design of the spoon lure is simple: an oblong, concave metal piece with a shiny chrome or paint finish and a single or treble hook on the end.
